

# CXL Dual Lane Controller Chassis

#829001 (115V/60Hz)

#829002 (230V/50Hz)

An enhanced direct replacement for AMF 82-90XL & 8800 Gold Dual Lane Chassis

The ZOT CXL Chassis has all the features of an AMF 82-90 XL Chassis, plus the following:

**Circuit Protection:** The ZOT CXL Chassis features four "Resettable" Breakers for each lane for added protection to the fuses in the Pinspotter cabling. If a Breaker trips, simply reset the Breaker after eliminating the cause of the overload.

**Note:** There are no fuses on an original AMF 82-90 XL Chassis

Additional features on the ZOT CXL Chassis include Mechanics option switches for:

- a) Sweep Reverse on Offspot
- b) Foul on – Foul off
- c) Ninepin No Tap plus:
  - Sweep and Table Motor Disable pushbuttons
  - Continuous cycle LED's

Resettable Breakers

Sweep and Table Disable

Mechanics Option

TEMPORARILY UNAVAILABLE

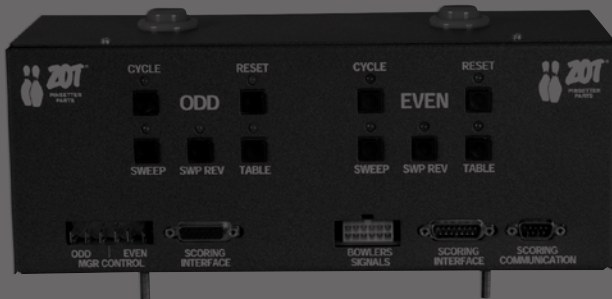

## Front End Dual Lane Control Box

#829004 (115V)

#829005 (230V)

An enhanced replacement for an AMF 82-90 Front-End Control Box.

The ZOT Front End Dual-Lane Control Box:

- Can eliminate the MCU with other brands (non AMF) of scoring systems.
- Can eliminate the need for the AMF Source Command interface.

## Fat Chassis Conversion Kit

#829100 (115V/60Hz)

#829200 (230V/50Hz)

An upgrade for AMF 82-90 Pinspotters with Fat Chassis

The #829100 Kit Includes:

- #420516 Hardware CXL
- #829101 One CXL Dual Lane Chassis
- #829103 One Set Cable Kit
- #829104 One Front End Dual Lane Control Box

Kit containing set of 10 each Conversion cables:
